Verification Method Virtual MFA device or security key 

Access Keys ?

? Access keys can be downloaded only once after being generated. Keep them secure, change them periodically, and **do not share them with anyone**. If you lose your access key, create a new access key and disable the old one.

Create Access Key

Access keys available for creation: 1

Enter an access key ID. 

Access Key ID 	Description 	Status 	Created 	Last Used	Operation
	--	● Enabled	May 12, 2026 21:28:53 GM...	--	Modify Disable

Multi-Factor Authentication (MFA) ?

? Virtual MFA devices added to IAM users can be used for login protection and operation protection, but security keys can only be used for login protection.

Add MFA Device

 Select a property or enter a keyword.

Device Name	Device Type	Identifier	Operation
-------------	-------------	------------	-----------
